RESEARCH INTEREST

The north star of my research is to develop a unified and scalable framework aligned with multi-modalities and human preferences for various vision-centric tasks. To this end, I am delving into multi-modal understanding (*e.g.*, VLM) and robot learning (*e.g.*, VLA), with a focus on 3D/4D world modeling that bridges perception, cognition and action for real-world embodied intelligence.

- **Multi-modal learning**
 - Reasoning [C3, C2, W1, P5, P3]
 - Omni-modeling [P5, P2]
 - World modeling
- **High-dimensional vision**
 - Spatio-temporal understanding [C3, C2, C1, P3, P1]
 - Motion & pose estimation [C1, P4]
- **Robot learning**
 - Action modeling & planning [W1]
 - Imitation learning
