RESEARCH INTEREST

The north star of my research is to develop a unified and scalable vision framework aligned with multi-modalities and human preferences. To this end, I am delving into multi-modal learning (e.g., VLM, UMM) and robot learning (e.g., VLA), with a focus on 3D/4D world modeling that bridges perception, cognition and action for real-world embodied intelligence.

- **Multi-modal learning**
 - Reasoning
 - Omni-modal generation
 - World modeling
- **High-dimensional vision**
 - Spatio-temporal understanding
 - Motion & pose estimation
- **Robot learning**
 - Long-horizon planning
 - World action modeling
